

SWEDEN!

Stenungsund, 28 januari 2011

Hello Cole!

Now I'm gonna to tell you about Sweden. In Sweden we have a lot of animals, like mooses, seals, wolves, bears, beavers and so on. But all these animals like to live when it's cold. Sweden is a small country with 9 millions habitants. The capital is Stockholm. Most people live in the south of the country. When it's 25° in the summer we think it's hot, and in the water it's about 20°. The most of the year it's very cold, this winter it have been a very cold winter about -15°. I can't wait for the summer. About 19 days I'm going on vacation to the Canary Islands I can't wait.

Seals in the coast.

We have a lot of holidays in Sweden. We celebrate Halloween, Midsummer, Christmas, easter and the New year eve. The biggest holidays are Midsummer, Christmas and the New eve.

We have a lot of famous people too, like Zlatan Ibrahimovic (football player), Dalibor Doder (handball player), Marcus Hellner (skier), Therese Alshammar (swimmer) and Björn Borg (former tennis player)

It's Dalibor Doder at the picture.

Sweden have monarchy and our King and Queen live in Stockholm. Sweden's coastlines are very beautiful at the summer. A lot of people live in their boats at the summer and travel from place to place, me and my family do that. Sweden's flag is blue with a yellow cross.
